

Rainer Rudolf, Member of the Executive Board, responsible for Administration and Legal Affairs

“The determining constituent of business success is solid growth on a steady financial basis – this has been neglected far too often during the development of the New Economy.” At adesso, we avoided this mistake right from the beginning and placed our emphasis on aspects of profitability even then when it was not popular to do so at all.”

Rainer Rudolf (born in 1962) studied Information Technology at the University of Dortmund from 1983 to 1990. After working as a freelance software developer at Dr. Materna GmbH from 1987 to 1989, he began to work at MacroTek GmbH in Dortmund's *Technologiezentrum* (Technology Centre). As head of the division software development, his responsibilities included the organisation of this division, the development of a local data network and the consulting of corporate clients.

In September 1994, he changed to Systemhaus LION GmbH, a former subsidiary of Verba-Immobilien AG and lately operating as Verbacom Service GmbH (predecessor of o.tel.o). In a huge project, he directed the realisation of the most modern and functional comprehensive system of that time for the real estate business. He also worked on the technical consulting of real estate companies in the scope of introducing this system as well as he helped in constituting an internal quality management system appropriate for ISO 9000.

Rainer Rudolf founded the adesso AG in May 1997 and as a member of the executive board he manages successfully all administrative activities. Until 2007 he was also in charge of all commercial activities. He is responsible for the solid economic development of the adesso AG. With the merger of the BOV AG and adesso, Rainer Rudolf took over the fields of Administration and Legal Affairs.
