adesso lottery tablet

retailer tablet

The retailer tablet is fully equipped with all the essential features retailers expect from traditional lottery terminals, providing a seamless and familiar experience.

player tablet

The display shows all essential transaction details, with a touch screen that can be toggled on or off by the clerk, allowing players to input information directly when needed.

service tablet

The service tablet completes the solution by offering everything from a win checker and digital playslips to displaying legal information, ensuring a comprehensive digital experience.

3rd party content

Effortlessly integrate third-party content, such as the engaging and powerful eInstants from Fennica Gaming.

digital signage

Digitalize your retail network effortlessly with our intuitive digital signage solution, delivering context-driven content managed seamlessly by the service tablet.

High efficiency for low cost

The adesso lottery tablet excels with its remarkably low acquisition, operational, and long-term costs - making it the perfect economical solution for lottery retailers.

The same software is running on different tablet devices. This makes it even more the best economical solution for lotteries. They can choose between powerful tablets with bigger screen size or ones with smaller screen size. Depending on e.g., the turnover of each retailer. **One-software-fits-all.**
